

YOUR MINI-PROFILE

Useful **Billing & Auditing** information for physicians

WHAT IS A MINI-PROFILE?

- An overview of your billings compared to your peer group so you can see if your billings are within the normal statistical boundaries
- Generated for all physicians who receive Fee for Service payments from MSP
- Includes all claim submissions and payments made which identified you as the physician who provided the service, or as the referring practitioner

WHY IS IT IMPORTANT?

- Identifying whether your billings are within the statistical norm for your peer group enables you to proactively address any potential issues
- It can alert you to fees or services that are flagged and that could put you at a higher risk of audit
- Understanding the flags on your profile can help you determine whether you need to make changes to your billings
- They are used by the Billing Integrity Program (BIP) in selecting physicians with very high costs for investigation

WHERE TO FIND IT.

- Your Mini-Profile is available on the Doctors of BC website under "My Account." Additional resources are available for members including webinars on billing tips, common billing errors and information on the audit process. The resources can be found in the Billing and Audits section under the "Managing Your Practice" tab.

Did you know?

Your ICD-9 codes are reflected in your mini-profile and may have an impact on your morbidity ratio.

Type of Practice (TOP)

Your TOP is determined by the type of services you were paid for during that calendar year.
