

The below table provides more specific information regarding which GPSC fees can be billed by Family Physicians under Alternate Payment/Funding Models.

As per the **GPSC Preamble**: For the purposes of these fees, Alternative Payment/Funding Model means an Alternative Payment Arrangement or Alternative Funding contract between an entity (e.g. Ministry of Health, Health Authority or other organization) and an individual physician or physician clinic. An Alternative Payment Arrangement or Alternative Funding contract may or may not be governed by the Physician Master Agreement. If services supported and paid through GPSC incentives are already included in an Alternative Payment/Funding Model contract, GPSC incentives are not billable in addition. Private agreements between physicians to pool FFS billings and pay out physicians in a mutually acceptable way (e.g. per day, per shift, per hour, etc.) are not considered as an Alternative Payment/Funding Model.
